

Forearm Forklift™ “Back and Floor Saver”

Lifting Straps for Remodelers, Woodworkers, Cabinet Makers, Appliance Installers, HVAC Installers, Restoration Specialists & people who are moving

Safe and Easy way for people lift hard to handle items

Types of Items can Lift: furniture, appliances, mattresses, large mirrors & pictures, HVAC units, Sheetrock®, generators, cabinets, woodworking machinery, upright pianos, copy machines, filing cabinets, etc.

The Forearm Forklift™ lifting/moving straps are easy to use, adjustable straps designed specifically for people to carry hard to handle items. These patented straps were originally designed for pro home delivery & moving teams, but since many other pros also move around household goods (i.e. refrigerators & entertainment centers), materials (i.e. sheets of wood & dry wall) equipment (i.e. HVAC units & generators) they became a valuable tool in their arsenal to get their jobs done safely and efficiently. In addition, these encourage proper body mechanics which reduce lower lumbar muscle strain. Another one of its advantages is that they are great for going up and down stairs. The Forearm Forklift™ has received numerous rave reviews from magazines, newscasts and insurance companies.

- Encourages proper lifting techniques
- Employs leverage making things carried feel 66% lighter
- OSHA accepted to reduce back injuries due to heavy & repetitive lifting
- Reduces floor damage caused by wheels rolling or sliding
- Each pair / complete set is small enough to fit in any tool box
- 1 year warranty
- Made of super strength webbing
